

## PRS-700 ALR Rifle

The PRS-700 is the product of nearly 10 years' research and development. A bolt action rifle based upon the Remington 700 action, available in 300WM and 338 Lapua for the discerning long range hunter, competitor, or tactical team. The PRS-700 features a lightweight advanced chassis system with a folding stock that allows for adjustment of the length of pull and cheek height and captures the bolt handle when folded. This allows the operator to configure his weapon to his personal physical requirements and transport the system more easily. Additional chassis features include a monolithic rail with removable rail pieces and cable routing guides which maximize rail insert space. Additionally, the PRS-700 features a 5-round detachable box magazine, a Leupold long range variable powered optic, and the Advanced Armament Corp Titan-QD quick detach sound suppressor.

## A Legend is Born...

- » First we start with a factory Remington 700 stainless steel long action magnum receiver, which we chamber in either 300 winchester magnum or 338 lapua magnum.
- » The entire factory receiver is blue printed and trued to precise tolerances and added to a PTG spiral fluted bolt with oversized tactical bolt knob.
- » Next the bolt lugs and bolt face are lapped to mate smoothly and lock tightly in the receiver.
- » A heavy stainless 22" Barleitein barrel is profiled to M7 specification and the bore is 5R rifled 1:10 RH, then crowned and threaded perfectly concentric to the bore. The trigger is stoned and tuned to snap like a crisp carrot.
- » Finally, after rigorous testing at the range, the barreled action is coated in either your choice of cerakote colors or Black-T and mounted in the chassis system.

<b>Model</b>	PRS-700
<b>Available calibers</b>	300 Winchester Magnum or 338 Lapua Magnum
<b>Range</b>	1200m (300wm) 1500m (338lm)
<b>Receiver</b>	Remington 700 SS Long Action Magnum
<b>Barrel</b>	22" Bartlein 5R, 1 in 10" RH
<b>Trigger Type</b>	Remington, modified
<b>Bolt</b>	PTG spiral fluted magnum bolt w/ Tactical Knob
<b>Chassis</b>	Modular, folding lightweight aluminum
<b>Rail</b>	Integrated monolithic 20 MOA continuous top rail
<b>Coatings</b>	Available in Cerakoe or Birdsong Black-T
<b>Magazine</b>	Includes Magpul 5 rd detachable Box, compatible with AICS system magazines
<b>Bipod</b>	Optional Harris BRMS or Atlas Bipods
<b>Optics</b>	Optional Leupold MKIV LRT 6.5-20x w/ H-58 Reticle
<b>Rings</b>	Optional Badger or Barrett for use with B.O.R.S. System
<b>Weight</b>	12.1 lbs
<b>Length</b>	Rifle only - 46.5" - w/ suppressor - 52"
<b>Suppressor</b>	Optional Advanced Armament Titan-QD or Titan-Ti suppressor
